

## Tools and consumables

### Cleaner pen for SC, ST, FC and LSH connectors

P/N: KE-FO-FC250

#### features

- tool for cleaning the end-face of 2.5mm ferrule (SC, ST, FC and LSH)
- one-click single action cleaning system
- suitable for cleaning plugs and connectors inside adapters
- extendable tip reaches recessed adapters of patch panel
- dry cleaning with antistatic tape
- over 800 cleanings per unit
- effective against a variety of contaminants

### Cleaner pen for LC and MU connectors

P/N: KE-FO-FC125

#### features

- tool for cleaning the end-face of 1.25mm ferrule (LC and MU)
- one-click single action cleaning system
- suitable for cleaning plugs and connectors inside adapters
- extendable tip reaches recessed adapters of patch panel
- dry cleaning with antistatic tape
- over 800 cleanings per unit
- effective against a variety of contaminants

### Cleaning box for fiber optic connectors

P/N: KE-FO-RC

#### features

- tool for cleaning the end-face of fiber optic connectors
- suitable for LC, SC, ST, FC, MU, DIN connectors
- dry cleaning with antistatic tape
- over 500 cleanings per unit
- effective against a variety of contaminants

### Fiber optic visual fault locator

P/N: KE-VFL

#### features

- tool designed for searching optical cable errors
- laser performance - output power 10mW (max. 18mW)
- wavelength 650nm
- suitable for connectors with diameter ferrule 2,5mm a 1,25mm
